Design and management across urban woodlands zones (Parallel session 'Woodland management')

Brief CV:

Anders Busse Nielsen is Associated Professor in urban forestry at the Swedish University of Agricultural Sciences, Alnarp. ABN was former assistant professor in urban forestry at University of Copenhagen. His expertises are urban forestry, woodland landscaping, afforestation, near natural forest structures and dynamics, and visual presentation of forest stand structures. At present ABN is mainly involved in developing bio-architectural and dynamic approaches for urban forest resources.

ABN is Deputy Head of the Department of Landscape Management, Design and Construction. The department undertakes research, education, extension and consultancy services in the area of urban forestry, technique and material, design of soil and vegetation, management and development of urban and peri-urban green spaces, and public involvement and communicative aspects of urban green space management. The department has 40 employees and an annual budget of 2.8 Euro, where app. half come from externally funded projects.
